

# Inventory

## LOCATE AND ITEMIZE INTEGRATED INVENTORY YOUR OWN WAY

Vadim's iCity Inventory module provides the user with increased accuracy and flexibility for total inventory control, including product history, turnover and availability. This module tracks inventory, simplifies data entry and reports material costs, providing you the information you need. The flexible descriptions and allocations of inventory items by category, department & location allow for a better managed, organized inventory system.

The depth and versatility of the Inventory module allow you to manage with ease and maintain the acquisition and storage of materials, equipment, supplies and parts.

## KEY SYSTEM FEATURES

- Save time by quickly creating requisitions & immediately entering them into the PO system
- Track orders and auto-generate requisitions
- Integration with purchase orders allows tracking of inventory from suppliers
- Inventory "issuance" allows for greater departmental control with tracking system
- Flexibility - increases accuracy of item status
- Provide tables to meet workflow
- Increase access to information to make better decisions and produce meaningful reports
- Provide up-to-date inventory status on demand
- Never run out of inventory again
- Bar Code options

### ABOUT VADIM

Vadim Software develops innovative, integrated financial, municipal, asset and utility management software for Municipalities, Local Governments and Utility Companies. Founded in 1975, Vadim has been dedicated to this market for over 37 years.

### iCITY ENTERPRISE

iCity provides you with the core software modules you need to run your organization efficiently, including Financial Systems, Payroll & HR, and extended Municipal Systems like Property Taxes, Utilities, Cash Receipting and more.
