

Municipal Ticketing

INCREASE TICKET REVENUES WITH CONVENIENCE, SPEED & ACCURACY

Vadim's iCity Municipal Ticketing module is an efficient way to manage the distribution of parking tickets, collections, reminders, summons and warrants while retaining previous violation history. This module has the ability to download data from automated handheld device software as well as various ticket delivery systems. Users are also able to download vehicle information from motor vehicle or law enforcement files.

The depth and flexible capabilities of the iCity Municipal Ticketing module enable municipalities to completely manage all stages of the ticketing process.

KEY SYSTEM FEATURES

- View previous violator status for immediate decision making
- Increase collection of revenue from outstanding violators
- Quick, accurate data from inquiries and comprehensive reports improves decision making
- Track down revenues and quickly check history
- Flexible user setup makes it easy to implement
- Manage and track collection of ticket revenue with accuracy
- Optional internet integration of ticket system allows citizens to conveniently pay online
- Reduce clerical workload and data entry errors by eliminating the need to transfer information from paper to computer
- Reduce paper ticket storage

ABOUT VADIM

Vadim Software develops innovative, integrated financial, municipal, asset and utility management software for Municipalities, Local Governments and Utility Companies. Founded in 1975, Vadim has been dedicated to this market for over 37 years.
